

German Priority Programme 1648 "Software for Exascale Computing"

About SPPEXA

The Priority Programme "Software for Exascale Computing" (SPPEXA) of the German Research Foundation (DFG) addresses fundamental research on the various aspects of HPC software. SPPEXA runs 2013-2019, and it is implemented in two three-year phases, consisting of 13 (phase 1) and 16 (phase 2) project consortia and more than 50 institutions involved. With SPPEXA's second-phase projects funded by DFG as well as the French National Research Agency (ANR) and the Japan Science and Technology Agency (JST), SPPEXA strives for bi- and trilateral research to pave the road towards exascale computing.
